SBRT Patient Positioning + Immobilization Solutions
for improved patient outcomes + clinical efficiencies

Body Pro-Lok ONE

CIVCO Radiotherapy
a better way
Body Pro-Lok ONE™: Customizable, Efficient, Reproducible

The Body Pro-Lok ONE System provides one simple solution for complex SBRT patient setups. This system features the ONEBridge, with unique design features allowing for improved patient positioning and compression plate restriction.

Customizable & Efficient
- Provides total body immobilization for hypo-fractionation treatments.
- Kevlar ONEPlatform™ provides seamless setup of patient from MR imaging/simulation to the Linac unit.
- Customized setups meet the patient’s needs, including two options for reducing respiratory motion.

Reproducible
- Components are indexable, allowing you to reproduce the same setup from day to day.
- Immobilization above and below the patient are reproducible following published guidelines.
- Setup sheet simplifies daily record keeping.

Improved Patient Positioning and Respiratory Restriction

The Body Pro-Lok ONEBridge is the only bridge on the market that features variable height adjustment along with lateral and tilting offset for varying body types. Two plate options are available for assisting in restricting respiratory movement: the Standard Respiratory Plate, or a Wide Respiratory Plate which can be coupled with a ComfortCare Cushion for additional customized comfort. A Respiratory Belt option is also available.

ONEBridge™
- Variable height adjustment with just one bridge.
- Lateral offset ability allows the bridge and plate to adapt to the patient’s natural posture and body type.
- Tilting offset ability allows optimal patient positioning for enhanced gantry clearance.
- Advanced latch engineered to release in less than three seconds for patient safety.

ONE Respiratory Belt

Respiratory Plate & Respiratory Belt
- Respiratory Plates place pressure at the level of the diaphragm to assist in restricting respiratory movement.
- Respiratory Belts provide pneumatic compression and immobilization to the abdominal region for SBRT treatments.

Support for SBRT & Body Pro-Lok ONE™

Fifty percent of lung tumors move >5 mm during treatment and unfixed tumors in the lower lobe can easily move >10 mm. This motion is not one-dimensional.¹

¹4DCT generated target MIP images may not adequately capture the entire target motion span, which can result in dosimetric inaccuracy in SBRT lung treatments...Targeting is more accurate when abdominal compression is used to reduce motion, compared with even sophisticated free breathing approaches."²

Body Pro-Lok ONE™ on Universal Couchtop™

**Seamless Integration**
- Body Pro-Lok ONE positioning devices natively connect to CIVCO’s Universal Couchtop, allowing customized setups with bridges that secure directly to couchtop.
- CIVCO’s Universal Couchtop is available for Linac and CT, providing an environment in simulation that is reproducible and dosimetrically matched in treatment.

**No Dosimetric Compromises**
- CIVCO’s Universal Couchtop is a strong, lightweight couchtop that offers DoseMatch™ Technology which reduces your chance of setup errors by creating safe and efficient treatment planning and imaging.
- Seven extensions, all Body Pro-Lok ONE™ enabled, are available to treat without using dose-attenuating overlays or support rails.

---

MR Solutions

**ONEPlatform™**
- The ONEPlatform™ (made of Kevlar) provides a MR Safe base for Body Pro-Lok ONE™ and many accessories. Always refer to product labeling to identify whether a device is MR Safe or MR Conditional.
- Universal Couchtop™ profile and indexing options provide for seamless integration of CIVCO’s positioning devices.
- Indexing holes and Transverse Lok-Bar™ allow lateral offset of platform for optimal clearance.
- Kevlar material is MR Safe.
- Lightweight and 72” long.

---

**Proton Solutions**

**Body Pro-Lok ONE Respiratory Belt**
- Provides pneumatic compression and immobilization to the abdominal region.
- Attaches directly to the Universal Couchtop.

---

**Comprehensive Accessory Package for UCT**

**Additional Body Pro-Lok ONE™ Integration**

Additional solutions are available to accommodate the use of Body Pro-Lok ONE accessories when Universal Couchtop™ is not available and avoidance of an overlay or platform is preferred.

**Elekta iBEAM® evo Couchtop**
- Provides direct attachment of the ONEBridge™ and ONE Respiratory Belt to iBEAM evo Couchtop
- Allows Body Pro-Lok ONE to be utilized with Elekta HexaPOD™ and iGUIDE Reference Frame
- Allows for 1 cm indexing of the ONEBridge and ONE Respiratory Belt to the couchtop

**Elekta iBEAM®® evo Couchtop**
- Provides direct attachment of the ONEBridge™ and ONE Respiratory Belt to iBEAM evo Couchtop
- Allows Body Pro-Lok ONE to be utilized with Elekta HexaPOD™ and iGUIDE Reference Frame
- Allows for 1 cm indexing of the ONEBridge and ONE Respiratory Belt to the couchtop

**ONEBridge™**
Unique design features allow for improved patient positioning and compression plate restriction.

**ONE Respiratory Belt**
Provides pneumatic compression and immobilization to the abdominal region.

**Wide Respiratory Plate with ComfortCare™ Cushion**
Helps diffuse pressure across the abdominal region, resulting in a more comfortable compression for the patient.

**Clamp-Lok™ Cushion**
Attaches to the ONEBridge and forms to comfortably enhance immobilization from above.

**Body Pro-Lok ONE™ evo Adapter**
Allows for 1 cm indexing of the ONEBridge and ONE Respiratory Belt to iBEAM evo Couchtops.

**ONEPlatform™**
MR Safe platform with Universal Couchtop™ profile and indexing options provides seamless integration of positioning devices.

**Monarch™ Overhead Arm Positioner**
Dual function hand grips allow for natural flexion of the patient’s wrists while providing increased positioning options for the clinician.

**Patient Handles**
Patient handles provide a stable place for immobilized patients to place their hands.

**Kneefix™ 3 & Feetfix™ 3 Cushions**
Contributes to better stability and reproducibility in the supine position.

**Headrests**
Headrests provide enhanced repositioning, accuracy and patient comfort.
