Comfort Marker 2.0 A New Level of Comfort

Improve your patient's radiotherapy journey and gain clinical efficiencies with the Comfort Marker 2.0, developed by Medical Precision B.V. This revolutionary reference point device brings a new level of comfort to the start of the patient's radiotherapy treatment.

The easy-to-use system is designed specifically for use in radiotherapy using technology popular within the permanent make-up industry. The device is carefully engineered to apply reference marks with controlled depth placement, resulting in less pain to the patient compared to other marking methods. Points may fade over time or are easily removable with a simple laser session after the patient's treatment is complete.

Ordering Information

Comfort Marker 2.0 System, Qty 1

Black Pigment (Qty 50)

MPCM2010INT

Patient Marking Set. Includes: Safety Needle (Qty 50), Ink Cup (Qty 50), MPCM4022INT

CE MARKED. THIS BROCHURE IS INTENDED FOR MARKETS OUTSIDE THE U.S.

Safety Needle, Ink Cup, Pigment

What European Radiation Therapists in the Netherlands are saying:

66

The cosmetic impact of the Comfort Marker's points are much less than the traditional points of 2 to 4 mm diameter placed manually. Points now are small and not dominantly present. For radiotherapy however they are very well visible reference points. What we like also is that everything is certified at Medical Grade, and this is something our hospital values as well...

Study Outcomes

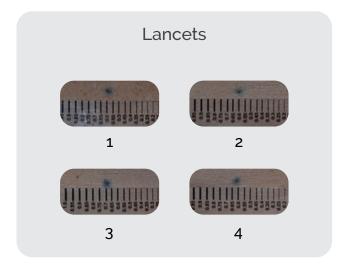

A clinical study compared two methods of placing tattoos that enable effective radiotherapy, Comfort Marker 2.0 and lancets. The study determined the following outcomes.

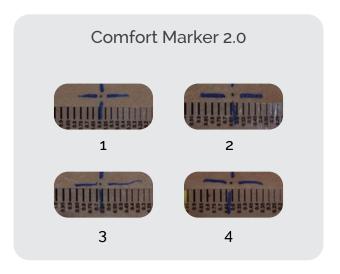

Tattooing with Comfort Marker 2.0 is:

- significantly less painful
- more effective and easier to apply
- cosmetically superior to tattooing with lancets

View the published study!

Placing the points with the Comfort Marker is much more comfortable for the patient... This makes our work much easier: the patient simply remains much more calm. Finally, we as professionals are happy with a system that really prevents sticking incidents. It is safe.

Patient Benefits

- Less painful tattooing keeps patients relaxed and more cooperative throughout the process
- Shallow and depth-controlled pigment placement compared to handheld lancets
- Result in cosmetically more pleasing tattoos that keep a round, uniform shape with well-defined edges

Clinician Benefits

- Sterile, easy to attach, and disposable safety needle module minimizes risks of needle stick accidents
- Simple depth setting selection with haptic and color feedback
- Rechargeable battery powered device allows freedom of motion within CT room for medical professionals

Device Benefits

- Placement of the tattoos with Comfort Marker 2.0 result in less procedural pain than tattooing with lancets
- Cosmetically superior tattoos made with Comfort Marker 2.0 compared to tattooing with lancets
- Placement of the tattoos with Comfort Marker 2.0 is more effective and easier compared to tattooing with lancets

Simple Workflow

Place Ink Cup onto the Device. Squeeze Pigment into the Cup.

Place the Safety Needle into the Pen.

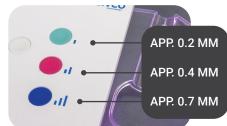

Turn on the Control Unit.

Choose the depth and absorb the Pigment (safety needle will light up the same color as depth chosen).

Place the reference point precisely.

PLEASE SEE INSTRUCTIONS FOR USE FOR ADDITIONAL INFORMATION.
