SBRT Patient Positioning + Immobilization Solutions
for improved patient outcomes + clinical efficiencies

Body Pro-Lok ONE™

Body Pro-Lok™

CIVCO
Radiotherapy
a better way
Customizable, Efficient, Reproducible

- Provides total body immobilization for hypo-fractionation treatments
- Kevlar platform options provide seamless setup of patient from imaging/simulation to the Linac unit
- Customized setups meet the patient's needs, including two options for reducing respiratory motion

Reproducible

- Components are indexable, allowing you to reproduce the same setup from day to day
- Immobilization above and below the patient are reproducible following published guidelines
- Setup sheet simplifies daily record keeping

MR Series™

Platforms made of Kevlar provide a MR Safe base for all Body Pro-Lok bridges and many accessories. Always refer to product labeling to identify whether a device is MR Safe or MR Conditional.

Support for SBRT & Body Pro-Lok ONE™

Fifty percent of lung tumors move >5 mm during treatment and unfixed tumors in the lower lobe can easily move >10mm. This motion is not one-dimensional.1

"4DCT generated target MIP images may not adequately capture the entire target motion span, which can result in dosimetric inaccuracy in SBRT lung treatments... Targeting is more accurate when abdominal compression is used to reduce motion, compared with even sophisticated free breathing approaches." 2

We have become a referral center for SBRT patients and have employed CIVCO’s Body Pro-Lok system for several years. It is my opinion that reproducible immobilization and abdominal compression is vital to assist in accurate targeting of lung cancers and other localized tumors. We recently upgraded our Body Pro-Lok system to the new Body Pro-Lok ONE and added a second complete system. We find it to be more flexible and efficient, especially with larger patients, without sacrificing the precision I demand.

Ronald C. McGarry, M.D., Ph.D. University of Kentucky, Lexington, Kentucky, USA

Body Pro-Lok ONE™ and Body Pro-Lok™ on Universal Couchop™

Seamless Integration

- Body Pro-Lok ONE and Body Pro-Lok positioning devices natively connect to CIVCO’s Universal Couchtop, allowing customized setups with bridges that secure directly to couchtop.
- CIVCO’s Universal Couchtop is available for Linac and CT, providing an environment in simulation that is reproducible and dosimetrically matched in treatment.

- CIVCO’s Universal Couchtop is a strong, lightweight couchtop that offers DoseMatch™ Technology which reduces your chance of setup errors by creating safe and efficient treatment planning and imaging.
- Seven extensions, all Body Pro-Lok™ enabled, are available to treat without using dose-attenuating overlays or support rails.

No Dosimetric Compromises

- CIVCO’s Universal Couchtop is a strong, lightweight couchtop that offers DoseMatch™ Technology which reduces your chance of setup errors by creating safe and efficient treatment planning and imaging.
- Seven extensions, all Body Pro-Lok™ enabled, are available to treat without using dose-attenuating overlays or support rails.

Accessory Packages

- Comprehensive Body Pro-Lok ONE (ONEBridge x2), ONEBridge Storage Base (x2), Body Pro-Lok ONE Respiratory Belt, Standard Respiratory Plate, Clamp-Lok™ Cushion (x2), Kneefix™ 3 Cushion, Feefix™ 3 Cushion
- Comprehensive Body Pro-Lok (Type 1B Bridge x2, Type 2 Bridge x2, Type 3 Bridge, Prodigy™ 2 Lok-Bar x3), Standard Respiratory Plate, Respiratory Belt, Type 2 & 3 Bridge Adapter Pair (x3), Type 1B & Shoulder Restraint Bridge 2 Adapter Pair (x3), Respiratory Belt Adapter Pair, Forehead Restraint, Shoulder Restraint Bridge 2, UCT Patient Handle (Right), UCT Patient Handle (Left), Clamp-Lok Cushion (x2)
- Body Pro-Lok Respiratory Restriction (Type 1B Bridge, Type 2 Bridge, Standard Respiratory Plate, Respiratory Belt, Type 2 & 3 Bridge Adapter Pair, Type 1B & Shoulder Restraint Bridge 2 Adapter Pair, Respiratory Belt Adapter Pair)

MTSBRT310
MTSBRT300
The Body Pro-Lok ONE System provides one simple solution for complex SBRT patient setups. This system features the ONEBridge, with unique design features allowing for improved patient positioning and compression plate restriction.

**ONEBridge™**
- Variable height adjustment with just one bridge
- Lateral offset ability allows the bridge and plate to adapt to the patient’s natural posture and body type
- Tilt offset ability allows optimal patient positioning for enhanced gantry clearance
- Advanced latch engineered to release in less than three seconds for patient safety

**ONEPlatform™**
- Universal Couchtop™ profile and indexing options provide for seamless integration of CIVCO's positioning devices
- Indexing holes and Transverse Lok-Bar™ allow lateral offset of platform for optimal clearance
- Kevlar material is MR Safe
- Lightweight and 158 cm long

**Body Pro-Lok Bridges**
- Three bridge options accommodate different patient sizes and provide immobilization from above.

**Carbon Fiber or Kevlar Platform**
- Provides seamless setup of patient from imaging/simulation to the Linac unit
- Compatible with existing CIVCO positioning equipment via standard two-pin (Carbon Fiber) and three-pin (Kevlar) indexing
- Provides low attenuation with homogeneous design for planning consistency

**Respiratory Restriction**
- Respiratory Plates place pressure at the level of the diaphragm to assist in restricting respiratory movement.
- Respiratory Belts provide pneumatic compression and immobilization to the abdominal region for SBRT treatments.

**Wide Respiratory Plate with ComfortCare™ Cushion**
- Wide Plate helps diffuse pressure across the abdominal region resulting in a more comfortable compression for the patient.
- ComfortCare Cushions, featuring innovative and patented technology by Pearl Technology AG, provide a new dimension of customized comfort at a reproducible pressure level.

For a full list of compatible accessories, see CIVCO's Solutions Guide catalog or visit www.civcort.com!
Additional Body Pro-Lok ONE™ Integration

Multiple solutions are available to accommodate the use of Body Pro-Lok ONE and Body Pro-Lok Bridges and accessories when Universal Couchtop™ is not available and avoidance of an overlay or platform is preferred.

Elekta iBEAM® evo Couchtop
- Provides direct attachment of the ONEBridge™ and ONE Respiratory Belt to iBEAM evo Couchtop
- Allows Body Pro-Lok ONE to be utilized on Varian Exact IGRT Couchtops and CT Overlays
- Allows 1 cm indexing of the ONEBridge and ONE Respiratory Belt to the couchtop
- Securely attaches to the couchtop by four dual-purpose lateral clamps
- Creates a 50 mm raised Universal Couchtop edge profile for attaching Body Pro-Lok ONE accessories
- Provides direct attachment of the ONEBridge™ and ONE Respiratory Belt to iBEAM evo Couchtop
- Provides full compatibility of Body Pro-Lok Bridges and accessories
- Integrated Lok-Bars™ provide additional stability
- Rails-Only T-Pin Lok-Bars provide compatibility with two-pin indexable products
- Exact indexing version features toggle and clamp design providing secure attachment

ONE Rails-Only for Varian Exact® IGRT Couchtop and CT Overlays
- Allows Body Pro-Lok ONE to be utilized on Varian Exact IGRT Couchtops and CT Overlays
- Allows 1 cm indexing of the ONEBridge and ONE Respiratory Belt
- Creates a 50 mm raised Universal Couchtop edge profile for attaching Body Pro-Lok ONE accessories
- Securely attaches to the couchtop by four dual-purpose lateral clamps

Accessory Package BPL ONE Rails-Only with ONEBridge

System Customization Part Number Index

Rails-Only for 50 and 53 cm Prodigy®, 50 and 53 cm Interloc®, 53 cm Elekta, 53 cm Varian Exact®
- Provides full compatibility of Body Pro-Lok Bridges and accessories
- Integrated Lok-Bars™ provide additional stability
- Rails-Only T-Pin Lok-Bars provide compatibility with two-pin indexable products
- Exact indexing version features toggle and clamp design providing secure attachment

Comprehensive Accessory Package
